

Government publishes shocking figures on COVID Vaccine Deaths: 1 in every 73 Vaccinated people died by June 2022 compared to just 1 in every 172 Not-Vaccinated People

expose-news.com/2023/03/21/1-in-73-covid-vaccinated-died-by-june-22

By The Exposé

March 21, 2023

According to official figures published by the UK Government institution, the Office for National Statistics (ONS), by the 1st of June 2022, 1 in every 73 Covid-19 vaccinated people in England had sadly died. But during the same time frame, only 1 in every 172 not-vaccinated people had sadly died.

These are extremely concerning figures when coupled with the fact that mortality rates per 100,000 are significantly higher among the vaccinated and lowest among the not-vaccinated in every single age group, as confirmed by the same ONS figures.

Let's not lose touch... Your Government and Big Tech are actively trying to censor the information reported by The Exposé to serve their own needs. Subscribe now to make sure you receive the latest uncensored news in your inbox...

For months on end, UK Government institutions insisted that they did not hold any data on deaths by vaccination status. Each and every single time a Freedom of Information request was made, the response received was as follows –

You asked

I request a copy of all data showing deaths within 28 days of a 'covid' vaccine in the UK, since November 2019 till present day

We said

Thank you for your enquiry.

We are responsible for the provision of mortality statistics for England and Wales. [National Records Scotland \(NRS\)](#) and the [Northern Ireland Statistics and Research Agency \(NISRA\)](#) are responsible for statistics pertaining to Scotland and Northern Ireland. They can be contacted at foi@nrscotland.gov.uk and info@nisra.gov.uk respectively.

Our death statistics are taken from the information supplied on death certificates. We do not hold data regarding the number of people who have died following the COVID-19 vaccine within a certain number of days, as the date on which a vaccine is administered is not information that is provided on the death certificate.

Source

But every single UK Government institution was lying, and now, we, unfortunately, know why.

The Office for National Statistics (ONS) is the UK's largest independent producer of official statistics and the recognised national statistical institute of the UK, and on the 6th of July, they published [a dataset](#) containing a whole host of horrifying data on deaths by vaccination status in England between 1st Jan 2021 and 31st May 2022.

Table 9 of the [dataset](#) contains figures on *'Whole period counts of all registered deaths grouped by how many weeks after vaccination the deaths occurred; for deaths involving COVID-19 and deaths not involving COVID-19, deaths occurring between 1 January 2021 and 31 May 2022, England'*.

Here's a snapshot of how the ONS presents the data –

This worksheet contains 1 table.

Source: Source: Office for National Statistics, National Immunisation Management

Week after vaccination	Age group	Count of Deaths involving COVID-19	Count of Non-COVID-19 Deaths
1	60-69	35	950
2	60-69	120	1557
3	60-69	136	1842
4	60-69	120	2009
5	60-69	123	2073
6	60-69	95	2130
7	60-69	78	2227
8	60-69	67	2249
9	60-69	54	2255
10	60-69	58	2388
11	60-69	73	2278
12+	60-69	2498	37013
1	70-79	104	2118
2	70-79	347	3600
3	70-79	508	4042

Source

The data presented allows us to work out how many people have died following Covid-19 vaccination in England.

The following chart shows the overall number of deaths following Covid-19 vaccination in England between 1st Jan 2021 and 31st May 2022 based on the figures provided by the ONS –

Number of Deaths following COVID-19 Vaccination in England

January 2021 to May 2022

Source: (UK Gov.) Office for National Statistics, 6th July Dataset, Deaths by Vaccination Status, England

According to the Office for National Statistics between 1st Jan 21 and 31st May 22, a total of 41,117 people died with Covid-19 following Covid-19 vaccination, and a total of 565,420 people died of any other cause following Covid-19 vaccination. This means that in all, 606,537 people sadly died by 31st May 2022 following Covid-19 vaccination.

How does this compare to deaths among the unvaccinated?

We need to take a look at table 6 of the [same ONS dataset](#) to find out.

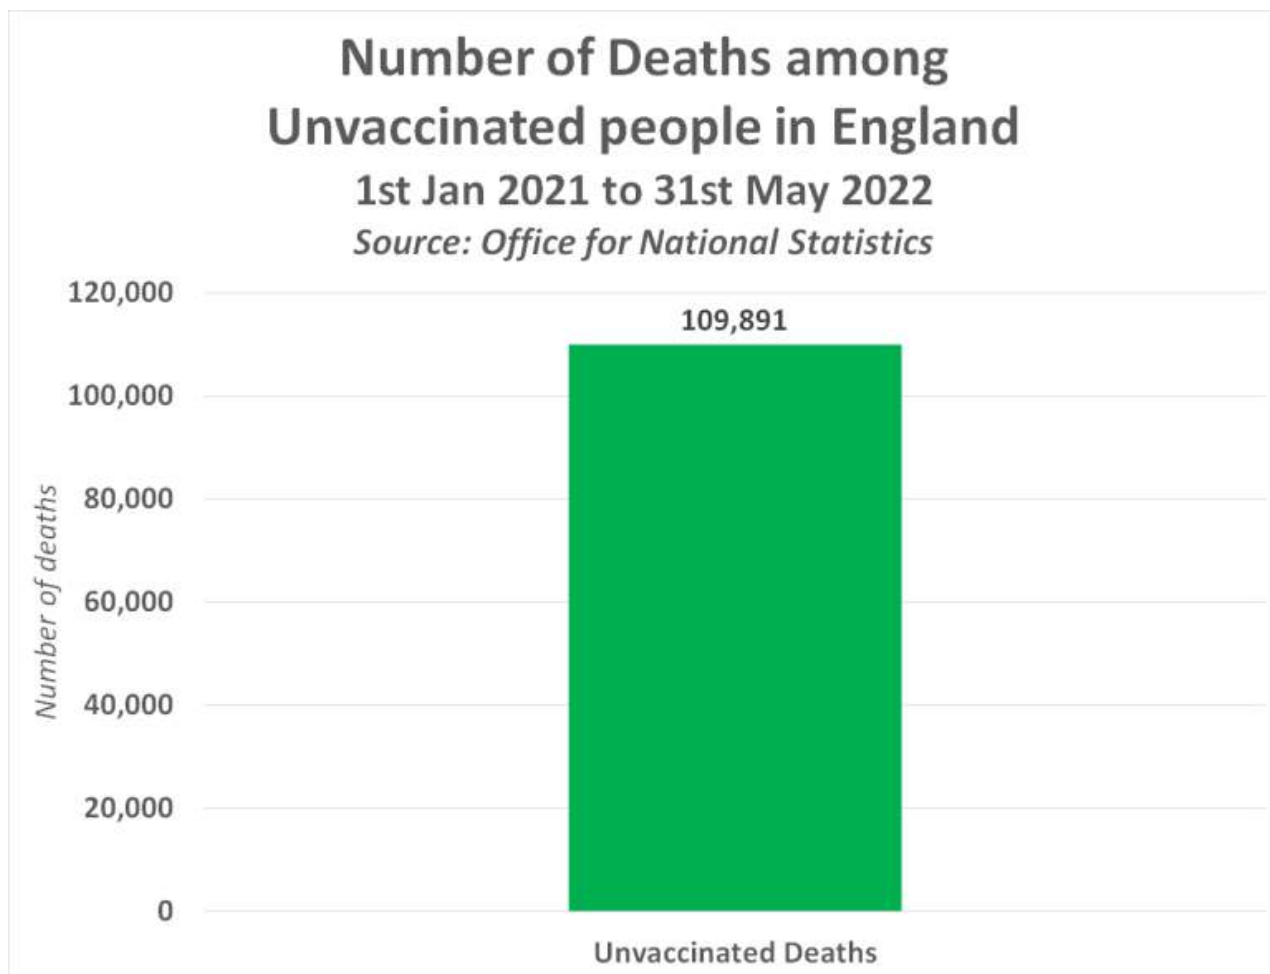

Whole period counts of all cause deaths, deaths involving COVID-19 and deaths not involving COVID-19, and person-years by vaccination status and five-year age group, England, deaths occurring between 1 January 2021 and 31 May 2022

This worksheet contains 1 table.

Source

The following chart shows the overall number of deaths among not-vaccinated people in England between 1st Jan 2021 and 31st May 2022 based on the figures provided by the ONS –

According to the Office for National Statistics, there were 109,891 deaths among people considered ‘unvaccinated’ between 1st January 2021 and 31st May 2022. This is already a huge difference, but of course, we need to take into account the number of people who have been vaccinated compared to the number of people not vaccinated.

The following table is taken from page 65 of the UK Health Security Agency’s [week 27 ‘Weekly national Influenza and COVID-19 surveillance report’](#), and shows vaccine uptake in England by age –

Table 5: Provisional cumulative COVID-19 vaccine uptake by age in England

NATIONAL	People in NIMS cohort	Vaccinated with at least 1 dose		Vaccinated with at least 2 doses		Vaccinated with at least 3 doses	
		Number vaccinated	% vaccine uptake	Number vaccinated	% vaccine uptake	Number vaccinated	% vaccine uptake
Over 80	2,946,025	2,818,037	95.7	2,800,942	95.1	2,728,187	92.6
75 to under 80	2,355,428	2,256,247	95.8	2,241,256	95.2	2,187,139	92.9
70 to under 75	2,764,825	2,606,724	94.3	2,584,219	93.5	2,496,589	90.3
65 to under 70	2,993,111	2,762,902	92.3	2,731,202	91.2	2,587,759	86.5
60 to under 65	3,628,509	3,291,737	90.7	3,245,874	89.5	2,986,114	82.3
55 to under 60	4,175,254	3,717,033	89.0	3,655,114	87.5	3,277,175	78.5
50 to under 55	4,247,550	3,676,016	86.5	3,599,983	84.8	3,123,017	73.5
45 to under 50	3,956,509	3,240,827	81.9	3,151,206	79.6	2,578,890	65.2
40 to under 45	4,349,072	3,351,970	77.1	3,229,066	74.2	2,485,578	57.2
35 to under 40	4,690,263	3,405,003	72.6	3,243,542	69.2	2,318,112	49.4
30 to under 35	4,895,523	3,410,544	69.7	3,204,714	65.5	2,134,792	43.6
25 to under 30	4,563,841	3,116,966	68.3	2,889,515	63.3	1,808,902	39.6
20 to under 25	3,917,777	2,826,821	72.2	2,561,019	65.4	1,533,070	39.1
18 to under 20	1,390,072	1,017,688	73.2	896,158	64.5	471,217	33.9
16 to under 18	1,393,464	909,897	65.3	698,342	50.1	186,650	13.4
12 to under 16	2,944,954	1,562,882	53.1	1,042,424	35.4	18,355	0.6
5 to under 12	5,084,722	484,810	9.5	24,762	0.5	41	0.0
Total*	63,391,306	44,480,115	70.2	41,852,943	66.0	32,966,513	52.0

Source

Please note that the above figures are solely for England, as you can see from the title of the table 'Provision cumulative COVID-19 vaccine uptake by age in England'. So these are the figures we need to compare against deaths in England.

We've created the following chart based on the figures provided by UKHSA above, showing the total vaccination uptake vs the total vaccination refusal in England per dose

—

COVID-19 Vaccination Uptake / Refusal in England as of 3rd July 2022

Source: UKHSA Weekly Flu & COVID-19 Surveillance Report - Week 27

The UKHSA state in their document that 63.4 million people were in the National Immunisation Management Service cohort in England, but only 44.5 million people had received at least one dose of a Covid-19 vaccine. Therefore, according to the UK Government, by July 3rd 2022, there were 18.9 million unvaccinated people in England.

Now that we know how many people are vaccinated and how many people are unvaccinated we can calculate the rate of death among the two groups.

44.48 million people had received at least one dose of a Covid-19 vaccine in England, and 606,537 of those people had sadly died. This, therefore, equates to 1 in every 73 Covid-19 vaccinated people having sadly died by the 1st of June 2022.

18.9 million people had not received a single dose of a Covid-19 vaccine in England, and 109,891 of those people had sadly died. This, therefore, equates to 1 in every 172 unvaccinated people having sadly died by the 1st of June 2022.

Number of Deaths per 1,000 people, COVID Vaccinated vs Unvaccinated, England, 1st Jan 2021 to 31st May 2022

Source: Office for National Statistics

Obviously, these figures do not take into account other factors such as age etc. but this is still a huge difference and is most definitely concerning when we take a look at the actual mortality rates per 100,000 by vaccination status and age group.

We can find those figures on table 2 of the [same ONS dataset](#) on deaths by vaccination status.

The official figures unfortunately confirm that mortality rates per 100,000 are the lowest among the unvaccinated population in every single age group in England. And the data reveals the gap between the unvaccinated and vaccinated populations in terms of mortality rates is widening by the month.

The following chart shows the monthly age-standardised mortality rates by vaccination status among each age group for non-Covid-19 deaths in England between January and May 2022 –

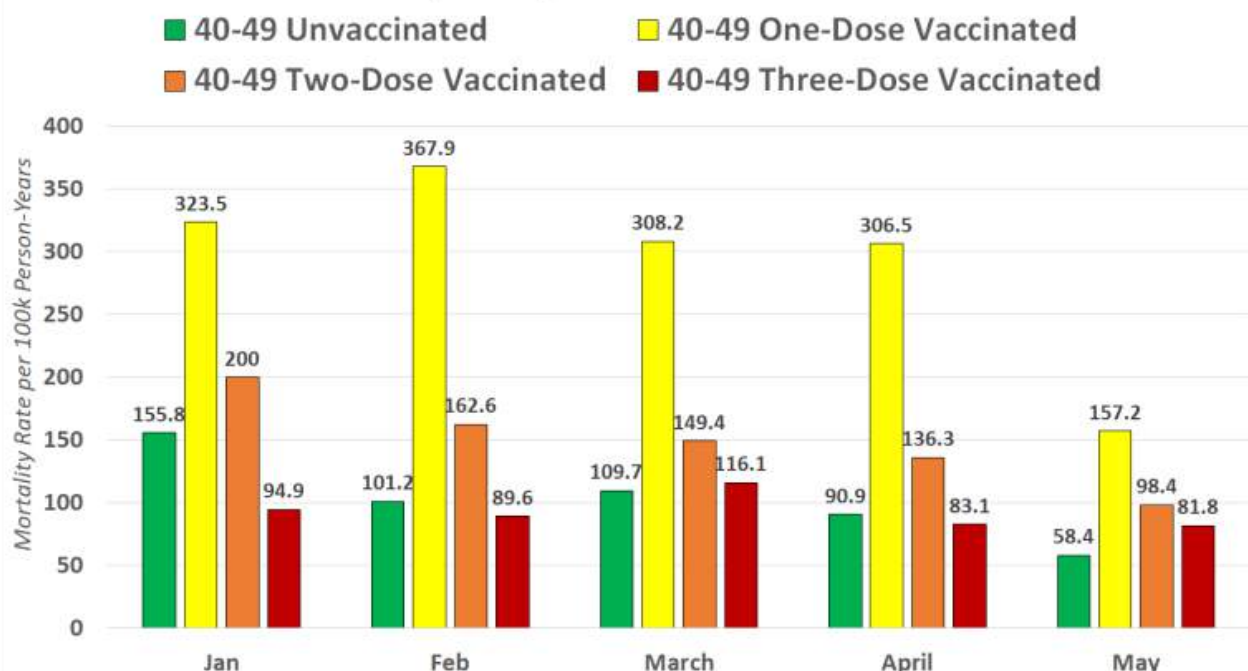

Monthly Age-Standardised Mortality Rates by Vaccination Status among 18 to 39-year-olds for Non-Covid-19 Deaths in England January to May 2022

Source: (UK Gov.) Office for National Statistics

Monthly Age-Standardised Mortality Rates by Vaccination Status among 40 to 49-year-olds for Non-Covid-19 Deaths in England January to May 2022

Source: (UK Gov.) Office for National Statistics

Monthly Age-Standardised Mortality Rates by Vaccination Status among 50 to 59-year-olds for Non-Covid-19 Deaths in England

January to May 2022

Source: (UK Gov.) Office for National Statistics

Monthly Age-Standardised Mortality Rates by Vaccination Status among 60 to 69-year-olds for Non-Covid-19 Deaths in England

January to May 2022

Source: (UK Gov.) Office for National Statistics

Monthly Age-Standardised Mortality Rates by Vaccination Status among 70 to 79-year-olds for Non-Covid-19 Deaths in England January to May 2022

Source: (UK Gov.) Office for National Statistics

Monthly Age-Standardised Mortality Rates by Vaccination Status among 80 to 89-year-olds for Non-Covid-19 Deaths in England January to May 2022

Source: (UK Gov.) Office for National Statistics

Monthly Age-Standardised Mortality Rates by Vaccination Status among 90+ year-olds for Non-Covid-19 Deaths in England January to May 2022

Source: (UK Gov.) Office for National Statistics

These are age-standardised figures. There is no other conclusion that can be found for the fact mortality rates per 100,000 are the lowest among the unvaccinated other than that the Covid-19 injections are killing people.

This is precisely why, according to the figures that the Government has made available, 1 in every 73 vaccinated people was dead by the beginning of June 2022 compared to just 1 in every 172 unvaccinated people.
