**MUST SEE VIDEO:** [Dr. Bärbel Ghitalla](#) analysed the blood of people who have had Covid-19 injections to try to help her patients suffering from the aftereffects. Dr. Ghitalla also obtained a bottle of Johnson and Johnson’s Covid-19 injection for analysis. Alarmed by what she saw through her microscope, [she discussed her findings with a medical colleague, Dr. Axel Bolland, as well as two lawyers, Holger Fischer and Elmar Becker.](#)

[Germany: Vaccine and blood analysis under the microscope. Presented by independent researchers, lawyers and doctors](#)

[Dr. Jane Ruby, on The Stew Peters Show](#), broke the news from Germany. [A summary of Dr. Ruby’s main points are:](#)

- The blood smears of these “vaccinated” patients shows that red blood cells (“RBC”) have acquired a positive charge (instead of a negative one, which allows blood cells to repel others and stay single) permitting them to ‘stack’ one upon the other. This is typical of blood cancer. They are called ‘rouleaux’ formations. So, the injections are changing the electron charge to positive in the RBCs.
- There are also coiled pieces present with a metallic sheen. They can easily be seen as they do not absorb light as RBCs do.
- The German doctors and lawyers in the video think it represents the beginning of thrombotic activity. The level of rouleaux formations in these blood samples is ‘severe’. We’re looking at severe RBC damage.
- From the Johnson and Johnson vaccine vial she obtained (it has a lot number and expiration date), samples show rigid structures/lines with tiny white dots in between.
- The German lawyers said there is a gross lack of informed consent.

## Blood Smears from the UK

At the beginning of July, Dr. Philippe van Welbergen, Medical Director of Biomedical Clinics, was [interviewed on a South African community channel](#). He explained that when his patients started complaining about chronic fatigue, dizziness, memory issues, even sometimes paralysis and late onset of heavy menstruation (women in their 60s upwards), he took blood samples. Their blood had unusual tube-like structures, some particles which lit up and many damaged cells. [Few healthy cells were visible. Until three months earlier, he had never seen these formations in blood.](#)

At a medical conference in The Netherlands, he found similar blood was being discussed; some blood samples even showed blue and red cells, which were not organic matter. “Linking the dots, we found they had all had the Covid ‘vaccine’,” Dr van Welbergen said.

**Left image:** Healthy blood shows cells able to move around separately; they have good motility and will not cause thrombosis

**Right image:** “These strands or tubes appear to be hollow – it’s really odd. When you really expand it, you can see some cells in it but we don’t know if it’s a crystalline structure or organic. The few healthy cells are circled. The rest are cracked and fractured – they’re finished. That’s not healthy blood. We see it again and again,” Dr. van Welbergen

Dr van Welbergen’s interview is two and a half hours long, however, Dr. Ruby briefly explained what Dr. van Welbergen discovered, watch [HERE](#).

### **Blood smears from Switzerland**

Covid “vaccination” causes instant clotting at the microscopic level, said [Armin Koroknay](#), the effect in a person’s blood is most severe after the second injection.

[Switzerland: Armin Koroknay, Catastrophic effects of “vaccination” on the blood](#)

Most of the video above is in English but some parts are in French. [A reddit user has helpfully translated](#) some of the French portions into English.

“The introduction says: Researchers use a specific technology (fluorescence) that allows the observation of red and white cells under a microscope. The first picture with a blue background that you see is that of the red cells of a healthy patients. Experts asked themselves, “does the blood look different before and after vaccination?”

“At 48s, the picture you can see is: on the left, the blood of an unvaccinated individual; and, on the right, the blood of a vaccinated individual.

“At 3mins 45s, it says blood observations made so far on a statistically significant enough number of patients show that vaccination results in: a lower level of white cells; grouping of red cells; and, excessive coagulation.

“At 4mins 33s a radiologist speaks about what he has observed: strokes typically occur within 1 – 3 months following mRNA injections; there will most certainly be long term consequences on lymphocytes and red cells, possibly leading to leukaemia and lymphomas. He says he gets lots of

consultations these days for pulmonary embolism, blood clots, and other symptoms caused by excessive coagulation.”

## Countless Warnings

There have been countless warnings, from many sources, from many countries, for many months about blood clots caused by the Covid injections. We too have been highlighting this life-threatening effect. A quick search on our website will bring up a list of numerous articles spanning several months. Some are, sadly, personal stories of people who have been vaccine-injured and some are articles about warnings from doctors and scientists that blood clots are a common effect of the Covid injections. Below is a small sample of our articles referring to blood clots resulting from the experimental gene-based Covid injections:

## Gaslighting and censorship by corporate state-controlled “mainstream” media continues

[The Trusted News Initiative, a BBC led organisation, is censoring experts who oppose the official narrative on Covid-19](#). Last year the BBC collaborated in the *Origin Project* and earlier this year the BBC teamed up with others to create the *Coalition for Content Provenance and Authenticity* to combat “misinformation and disinformation.” [The BBC is the biggest propaganda machine the world has ever seen](#). Below are examples of that propaganda in action.

[Doctor Zoe Williams was cut short during a \*This Morning\* show](#) while responding to a question about [Vaccine-induced Thrombotic Thrombocytopenia \(VITT\)](#) blood clots.

[This Morning \(ITV\) Eamonn Holmes and Ruth Langsford speaking with Doctor Zoe Williams](#)

Although ‘*This Morning*’ is an ITV show it broadcasts from studios run by BBC and is regulated by Ofcom, the UK broadcasting regulator. As reported by *The Daily Sceptic* in June, [Ofcom is relying on “fact-checking” organisation ‘Full Fact’](#) to inform what it should suppress. Not much research is needed to begin to see the links between these corporations, media organisations and their initiatives.

Another recent example of censorship and attempts to silence voices speaking out is Dr. Anne McCloskey, a General Practitioner in Northern Ireland.

Dr McCloskey retired in 2019 but returned to the health service last April in response to the pandemic workforce appeal. Ten days ago, Dr. McCloskey made a public appeal:

[Dr. Anne McCloskey talks about massive increase in Covid injection victims’ blood clotting](#)

A few days later she made [an appearance on a BBC Radio show](#). On that same day, Dr. McCloskey was suspended by the Health and Social Care Board for her “Covid-19 vaccine comments.”

It is outrageous that the voices the public needs to hear from are being denied. Especially considering the public’s health and well-being is at stake. A far superior job of investigative reporting is being done by the hard-working alternative media researchers without Big Pharma’s blood-stained advertising dollars.
