As researched and compiled by [TerminalCWO](#):

On January 25, 2022, [Thomas Renz](#), the attorney for Doctors [Peter Chambers](#), [Theresa Long](#), and [Samuel Sigoloff](#), testified before Congress regarding data leak directly from the Defense Health Agencies Defense Medical Epidemiology Database, otherwise known as DMED. Within DMED exists the Defense Medical Surveillance System's DMSS, which contains up to date and historic data on diseases, medical events, and on DoD personnel. The database is similar to VAERS, the vaccine adverse event reporting system, but it's distinct in that it only applies to DoD military personnel and only medical providers can input information into the system. Upon inspection, we can see that information has been gathered from a five year average of diseases and medical disorders.

THE TERMINALCWO, WHICH IS A FREE MEDIA NETWORK OF ACTIVE DUTY CHIEF WARRANT OFFICERS, RELEASED A DEVASTATING VIDEO ACCOUNT DESCRIBING THE CURRENT DISEASE STATISTICS REPORTED BY DEPARTMENT OF DEFENSE MEDICAL DATABASES. THE ACCOUNT IS REplete WITH GOVERNMENT WEBSITE SCREENSHOTS AND DATA RECORDS.

THERE IS AN UNDENIABLE CORRELATION BETWEEN THE MANIFOLD INCREASES IN RARE AND LIFE-THREATENING DISEASES TO THE INJECTION OF A REQUIRED EMERGENCY USE VACCINE AMONG MILITARY PERSONNEL.

LLOYD AUSTIN APPEARS TO TO BE STRONGLY INCENTIVIZED FINANCIALLY TO ISSUE THE MILITARY ORDERS TO FORCIBLY IMPLEMENT THE VACCINATION ORDERS AMONG THE SERVICE BRANCHES.

The current data reflects diseases in 2021 through the tenth month only. All data reflects reporting from January through November 2021. Annual cases are average over the past five years.

Pericarditis rose 175% from 589 annual cases to YTD 1,029.

Myocarditis rose 285% from 127 annual cases to YTD 363.

Pulmonary embolisms 467% from 746 annual cases to YTD 3,489,

Cerebral infarction rose 393% with current YTD 3,438.

Bell's Palsy rose 319% with current YTD 1,470.

Guillain-Barre Syndrome rose 250% with current YTD 3,635.

Immunodeficiencies rose 275% with current YTD 3,172.

Immune Thrombocytopenic Purpura rose 322% with current YTD 564.

Menstrual Irregularity rose 476% with current YTD 22,938.

Multiple Schlerosis / Demyelinating Diagnosis rose 487% with current YTD 3,444 .

Neoplasms (tissue growth, often cancer precursor) rose 296% with current YTD 114,645.

Nontraumatic Subarchnoid Hemorrhage/ICH rose 312% with current YTD 1,858.

Spontaneous Abortion / Miscarriage rose 306% with current YTD 4,602.

Disseminate Intravascular Condition rose 1,175% from 7 annual cases to YTD 87.

HIV rose 590% from 454 annual cases to YTD 2,681.

Chest pain rose 1,529% from 4,892 annual cases to YTD 74,813 individuals.

Dyspnea / Difficult or labored breathing rose 905% from 4,968 annual cases to YTD 44,990.

Why would the DoD knowingly continue to harm the service members that comprise the military? While answer that question for certain, we can offer a great deal of information which we have use to form our opinion.

VACCINE) RISK MANAGEMENT PLAN,” which has laid out detailed plans to study the US Department of Defense (DoD) data regarding service member’s response to Covid-19 vaccines. A document within the study entitled “Pharmacovigilance Plan” highlights the study of C4591011, a post-authorization study for personnel with DoD and their family members and how myocarditis and pericarditis affect those who have taken Pfizer’s BioNTech vaccine. The sponsor, in this case the DoD, has agreed to provide regular studies of the EUA vaccine on service members and periodic safety reports.

Because Pfizer has not produced their FDA approved COMIRNATY and we know based on our own research reporting along with numerous other publications that EUA vaccines are the only vaccines available to service members, we can surmise that American military forces have been used as a giant study group for over a year now.

We also know that Pfizer’s COMIRNATY, which once again hasn’t been produced, was given a Biologic License Application Approval on August 23, 2021 from the FDA and had that same BLA license withdrawn on the same day. Secretary of Defense Lloyd Austin announced a mandatory vaccine for service members on August 24, 2021 based on the licensing, even though the licensing had been withdrawn before his announcement.

Due to political influence applied to the vaccine, and the amount of money made off its distribution, it’s hard to imagine an agreement wasn’t made behind closed doors to make the vaccine appear as if it had been approved by the FDA. The Secretary of Defense himself owns over 29,868 shares of TENET Health, a company that has received a vast amount of money from Pfizer’s vaccine and lined the SECDEF’s pockets along the way.

Because of the unlawful manner in which the service branches applied the SECDEF’s order, hundreds of thousands of members have been discharged under the false pretense of disobeying an unlawful order and thousands have been barred from re-enlisting or continuing to serve after their contracts expire. What we are witnessing is nothing less than an outright assault on the armed forces who protect America’s Constitution and subvert her freedoms.

Sources have told us the DoD tried very hard to conceal this information to prevent it from getting out. The release of this information implicates numerous officials at the highest levels of the Pentagon in numerous crimes. The expulsion of those service members who refused the vaccine along with the thousands who were injured or killed because of this will have disastrous effects on the United States national security in the immediate and long-term future.
